should be made available to)
public safety answering points)
for costs to implement text to)
911 solutions: Dodge County 911)
Board.) Entered: April 28, 2015

BY THE COMMISSION:

On May 6, 2014 the Nebraska Public Service Commission (Commission) entered an order on its own motion seeking to investigate and determine whether additional funds from the Enhanced Wireless 911 Fund should be made available to public safety answering points (PSAPs) for costs to implement text to 911 solutions.

On November 4, 2014 the Commission released Progression Order No. 3 in this docket, setting out the procedure to fund text to 911 outside the cost model for PSAPs ready to implement technology solutions on an interim basis. The staff proposal adopted set out the application process for PSAPs seeking interim funding for text to 911 solutions.

O P I N I O N S A N D F I N D I N G S

According to Neb. Rev. Stat. 86-465(2), costs incurred by public safety answering points for the provision of enhanced wireless 911 service may be eligible for payment from the Enhanced Wireless 911 Fund, according to standards and criteria established by the Commission.

Pursuant to the staff proposal adopted in Progression Order 3 in this docket, the Commission may approve funding requests for text to 911 technology solutions costs such as text control center contracts, staff training, trunks necessary for additional text traffic, other costs related to the provision of text to 911 services not attributed more generally to 911 emergency response services. Progression Order No. 3 further specified that the Commission intended to limit approval of text to 911 related service contracts to no more than three years.

On February 27, 2015 Dodge County 911 Board submitted an application in this docket requesting text to 911 funding for a SMS to TTY solution. The application lists \$4,090.00 of non-

recurring costs for equipment and \$11,160.00 of monthly recurring costs over 36 months.

The application was then reviewed by technical subject matter experts, Mission Critical Partners, who advised the Commission that the technology proposed by Dodge County 911 Board was Next Generation 911 compatible and covered all wireless carriers currently deploying text to 911. MCP held no reservation in the technical design of the solution; however, MCP recommended that redundant network connectivity be considered for addressing the single point of failure risk. The Commission will further investigate this issue.

On April 20, 2015, the Wireless 911 Advisory Board considered and approved Dodge County 911 Board's request for text to 911 interim funding.

The Commission finds the application submitted by Dodge County 911 Board contains eligible costs under the interim text to 911 funding orders. PSAPs must submit invoices for payment by the Commission or submit invoices with evidence of payment for reimbursement to the PSAP from the Enhanced Wireless 911 Fund.

O R D E R

IT IS THEREFORE ORDERED by the Nebraska Public Service Commission that the text to 911 technology solution funding request submitted by Dodge County 911 Board be and hereby is approved in an amount not to exceed fifteen thousand two hundred and fifty dollars (\$15,250.00).

IT IS FURTHER ORDERED that Dodge County 911 Board submit required documentation to justify all expenditures for payment or reimbursement from the Enhanced Wireless 911 Fund.

MADE AND ENTERED at Lincoln, Nebraska, this 28th day of April, 2015.

NEBRASKA PUBLIC SERVICE COMMISSION
